

TGS-NOPEC Phase 47

FUGRO-LCT High-Resolution Gravity Data

FUGRO-LCT and TGS-NOPEC are pleased to announce the availability of new high-resolution 2-D marine gravity and bathymetry data on the Phase 47 survey recently completed in the deep water Gulf of Mexico. The data was acquired concurrently with the seismic program, with the full survey totalling 7,225 line miles of data, acquired primarily in Lund and Walker Ridge areas. Phase 47 lines are shown below in red.
